DATCO in brief

DATCO is an Egyptian, engineering company, founded in 1994. Being an agent and authorized distributor for worldwide market leading brand names, allows DATCO to serve most of the industrial sector such as steel, cement and paper industries; alongside the automotive sector. DATCO's team work firmly to guarantee an exceptional service to its customers throughout two administrative offices located in Cairo and Alexandria and another four product outlets located in Down Town Cairo, The Tenth of Ramadan, Sixth of October City and Alexandria.

Mission

We are the trusted agent and distributor for market leader brands. We deliver quality products with competitive edge to our dedicated industrial and automotive customers, who seek assets optimization. Our mission is reducing production cost and improving customer revenues through implementation of the equitation:

Total cost of ownership = Initial Cost + Running cost + Downtime Cost

Initial Cost -> Develop and provide cost efficient supply facilities and agreements

Running cost -> Deliver premium product assortment and conduct product knowledge to our customers

Downtime Cost -> Offering reliable services related to our products portfolio

We promise our customers to perform with the essence of:

"We Truly Care"

Added Value

Our added values, are executed through three main pillars, one pillar is to conduct the product knowledge and solution to our valuable customers, the other pillar is to perform important maintenance and service activities that our customers can benefit from, and the third pillar to be as close and reliable as possible to our customer.

Shell Lube Analyst

Shell Lube Analyst reports provide a detailed analysis of your equipment. Not only will you receive the test results, you will also get diagnosis which explains the different values and gives advice specifically tailored for your machinery. After sending the second sample for testing, you will receive graphs showing the trends for each test element. Analysis is done in third party SGS labs in France and results are sent directly to you within 5 - 7 days from the date of sample registration.

Shell Lube Coach is a quality training program specifically designed to empower your staff to deliver the benefits of a well designed lubrication plan

Vibration analysis at the customer site

Installation of ABB smart sensor for important Motor at Pepsi Tanta Plant

SKF training at Datco Premises by Engineer Ali Mohie (Distributor Development Manager at SKF)
